Tricia:

Re: "This is not a water issue".

When you type up the notes, please clarify what the complaint is. We were confused by her email. Is her comment "Oasis put this oil like substance on the road in front of my neighbor" a complaint about potential runoff (which does make it a water issue) or is she wanting that treatment on her road too??

Would she prefer calcium chloride (which is likely actually magnesium chloride) because of runoff concerns or is she just asking for anything that controls dust?

Jim

I spoke with Ms. Schilke today to inquire about activities that have occurred on the property. I will get the notes typed up and forward them over under a separate email.

Jim, Kris, Dave and John:

With regards to the email below. I informed Ms. Shilke **that this is not a water issue** and that I would look into who at the State level could assist her. Does this issue fall under NDIC or ND DOH? I am trying to think of how to more efficiently handle Ms. Schilke's concerns by creating a contact list of proper channels, what's your thoughts?

Look forward to hearing from you,  
Tricia

Tricia:

Since Alex, Cindy, and I will be visiting with Jacki next week, I'd like to know how you're going to handle this complaint so we know what to communicate with her.

Jim

**Subject:** dust control

This is the way Oasis Petroleum does business, they pick and choose who they are killing. On Friday, July 13 Oasis put this oil like substance on the road in front of my neighbor directly to the east of me 1 mile, they will not do dust control for anyone else in the area. He did not sign a release or was even asked to sign a release to do this. We have asked many times to do dust control and they refuse, we are told we have to sign a release to have this done. This past spring they also put calcium chloride on the road by Hawkin Jorgenson during calving season, Hawkin did not sign a release to have this done. We breath this dust 24/7, our home sits in a low lying area and it sits right in out yard and will not blow out. The trucks will not slow down when they drive by the house, the cattle are standing in a cloud of dust, dirt running out of their noses.
